

Northumberland's P.R.U.

SCIENCE DEPARTMENT

CURRICULUM INTENT

“Curiosity drives discovery. Science shapes our future.”

Here at Northumberland PRU we aim to deliver a curriculum that awakens pupils' natural curiosity for the world around them.

We aim to engage, encourage and challenge all pupils, through the use of enquiry based teaching, to develop transferrable practical skills and relevant scientific knowledge.

We want pupils to be innovative, and to excel at what they enjoy most about our subject.

We want pupils to share our enjoyment of all things scientific, and to get involved in researching and talking about the latest scientific discoveries.

We aim to encourage pupils to explore STEAM related careers and provide opportunities for pupils to find out more about those careers that interest them.
